

— OUR —  
**HONEY**

• —●— About the Company —●— •

We are a family business with traditions going back to 1989. Our business consists in purchasing natural honey, its packaging and customising as well as distribution throughout the country and abroad. Artificial honey is also produced. Our product portfolio is complemented by natural maple syrup that we have started selling, imported directly from Canada

From the very beginning of our business, the quality of our products has been of particular importance to us, and as such we have consistently been standing out on the market. Many years in business allowed us to develop the best methods of honey production, packaging and customising, as well as to develop our sales network, thanks to which we can reach a wide range of customers with our products. The passion in our approach to work results in further successes on the market and the consistently high quality of our products.

Our production plant as well as laboratory operate according to world quality standards: FSSC 22000, HACCP. Therefore, we are able to select only the best raw materials, test them thoroughly and then deliver only the best products to our customers. This is how we have built a recognisable and appreciated brand. The fact is proven by the numerous awards, certificates and honourable mentions we have received. Here are some of them: ATTESTED FOOD PRODUCTS (ŻYWNOŚĆ ATESTOWANA), CONSUMER QUALITY MARK (KONSUMENCKI ZNAK JAKOŚCI), BEST IN POLAND (NAJLEPSZE W POLSCE), APPRECIATE POLISH PRODUCTS (DOCEŃ POLSKIE).

Our company is reliable and prompt-acting. We meet all the agreed conditions, and thus the company is perceived as trustworthy. Our customers are satisfied with the cooperation. You can find our products in both retail chains and the HoReCa channel. Our offer is used by food producers, confectioneries, bakeries, schools, restaurants and public institutions.

Please feel invited to contact us. It is certain we will find the right arrangement.

MULTI-FLOWER HONEY is the best known and most popular type of honey. As the name suggests, it is obtained from nectar collected by bees from various plants of crops, meadows, forests and mountains. Its nutritional and medicinal qualities are influenced by the abundance of plants on which bees have collected their forage. It is used especially in the treatment of allergic diseases.

BUCKWHEAT HONEY has a very strong aroma reminiscent of buckwheat flowers. The taste is spicy, sweet and even slightly acrid. It is characterised by a deep dark colour. It is distinguished by a particularly high magnesium content and is therefore used in an anti-cancer diet. It offers high antibiotic activity. Used to treat cardiovascular diseases, especially caused by atherosclerosis.

ACACIA HONEY is made from the nectar of acacia tree flowers – *Robinia pseudoacacia*. It has a weak smell and a light amber colour, but it can also be colourless. It contains a high amount of fructose which makes it crystallise slowly. The sweetest of the honeys. Used to treat gastric hyperacidity and digestive system disorders. It also supports the functioning of kidneys.

RAPESEED HONEY is characterised by a weak smell similar to the smell of blooming rapeseed flowers. When in the liquid state, it has the straw-coloured or can be colourless. Due to its high content of monosaccharides, it is easily absorbed by the liver, thus increasing detoxification capability. Used to treat atherosclerosis and hepatobiliary diseases.

MAPLE SYRUP is a traditional Canadian product, called Canada's Liquid Gold for a reason. In addition to its appreciated taste, it is characterised by a variety of nutrients. It is a perfect substitute for sugar, and above all, it is much healthier than sugar because it shows a number of pro-health activities confirmed by a lot of scientific research.
